I'm not robot!

Our powerful image compression tool that makes it easy to reduce the file size of different image files such as PNG, JPG, GIF, SVG, and more. As the number of different file types have increased over the years we have seen new file types appear that range in size to such an extent that there's a need for users to be able to compress files. For example, we've all been at work and been sent a spreadsheet, document or presentation that has blown our mailbox. We've all visited websites that seem to take an age to load and that's because the images used on the site are unnecessarily large in size. Sometimes, there's a requirement to have the highest quality file possible - perhaps a wedding picture you want printed or a movie that you are airing. However, most of the time we want to be able to send files quickly and to also be able to consume them easily. This is why we have built the Zamzar compression tool. We are able to compress all different types of files - Images, Documents, Videos and Audio files - and allow users to make those files smaller whilst still retaining their overall quality. Just like our conversion tool, it is simple to use and can all be done online in an instant. How to compress a PDF Just drag-and-drop your PDF file in the box above, wait for the compression to complete and download your file. It's that simple. Security guaranteed Your files will be permanently deleted from our server after one hour. No one has access to your files and privacy is 100% guaranteed. All platforms supported Smallpdf.com is browser-based and works for all platforms. It doesn't matter if you use Mac, Windows or Linux. Perfect quality Reduce your scanned PDF files to 144 dpi which is perfect for uploading files to the web and through email. Easy to use The file size limit is 5GB. Even with large PDFs, it will take a few seconds for our compression tool to work its magic.
